Globalization
A study on the Mergers & Acquisitions undertaken by Chinese Enterprises Overseas (Report & Article) (Completed)
Faculty Advisor: Prof. Ouyang Hui  Case Researcher: Yang Yan
Since China joined the WTO in 2000, more and more opportunities of cross-border exchanges and international cooperation have been made possible for Chinese enterprises. “Going abroad” of Chinese companies were frequently seen, especially in the recent years. With the gradual relax on the cross-border investment policy made by Chinese government, the pressure of industry transformation and upgrading faced by Chinese enterprise and the asset allocation demand under a softening yuan, overseas acquisitions by Chinese companies are taking on an upward trend no matter by the number of transactions or by the total transaction value.
Through case study, the research firstly from macro perspective analyzed the changes in different stages of cross-border mergers and acquisitions during several decades of Chinese economic development and secondly from micro perspective summarized the key factors for success or failure of the cross-border mergers and acquisitions undertaken by Chinese enterprises so as to provide lessons and references to Chinese companies involved in such initiatives.

Geely’s Acquisition of Volvo, how to Have a Successful May-December Marriage between the Two Auto Companies (Case & Article) (Completed)
Faculty Advisor: Prof. Ouyang Hui  Case Researcher: Yang Yan
Geely, the young Chinese automotive company acquired Volvo, the long-established world-renowned Sweden car maker by buying 100% of its equity at one scoop in March, 2010. For Volvo who's stuck in development bottleneck, this is an inevitable choice to develop Chinese market, while for Geely, this is undoubtedly a challenging task in its globalization drive. After this “snake swallowing elephant” type of M & A (a weak brand on a strong brand scenario), Geely has to not only restructure its production but also face management and cultural conflicts. How should Geely, as a young Chinese company, manage Volvo who is deeply rooted in European culture? To cope with difficulties in the integration process, Geely adopted a creative approach – “Geely and Volvo should work as brothers. And it’s not a father-son relationship”. So it is not a merger in traditional sense, but one with paralleled production through which Geely and Volvo can make full use of their respective advantages with each one's own existing management systems. Breakthrough in production and sales with win-win results has been achieved in many years thereafter.

Huawei's Globalization Drive, Gain and Loss from its M&A Activities in North America (Case & Article) (Completed)
Faculty Advisor: Prof. Ouyang Hui  Case Researcher: Li Mengjun
Huawei entered the U.S. market in 1999. In the past 18 years, it has gone through all sorts of activities such as establishing R&D centers, subsidiary companies and joint ventures and being engaged in mergers and acquisitions. But the U.S. is still not a fully established market for Huawei. Despite of repeated failures and setbacks, Huawei still pays its full attention to North America and has never stopped fighting for a breakthrough. This case is focused on two failed acquisitions of Huawei in the United States. Through reviewing Huawei’s North America strategy and analyzing the cause of the failed acquisition cases, we’ll conclude Huawei’s strategic deployment in North America and draw some lessons from its failures.

ChemChina acquired Syngenta (Completed)
Faculty Advisor: Prof. Li Xueman  Case Researcher: Zhu Yunhai
The management of ChemChina met the board of Syngenta in Zurich on the night of 2 Feb 2016 and signed an acquisition deal of USD 43 billion. By 7 June, 2017, ChemChina completed the second also the last transaction and made the acquisition official. Subsequently, Syngenta will withdraw from the market according to related legal procedures. Syngenta as one of the world’s leading pesticide and seed suppliers has officially become a part of ChemChina. Maybe it's still early to tell whether the acquisition is a success. The implications may be seen in at least five years or even ten years. A good way to judge if it is a true success is probably to see whether it can serve as a driving force toward the upgrading and globalization of Chinese economy.

Midea’s Acquisition of KUKA – New Milestone of Overseas M&A (Completed)
Faculty Advisor: Prof. Huang Chuyuan  Case Researcher: Deng Di
Midea successfully purchased KUKA, a German Robot business, with transaction value of 4.5 billion. The “cross-border marriage” becomes one of the biggest acquisitions overseas conducted by Chinese companies. Its impact on home appliance and robot industry in China and the world as a whole shall not be underestimated. What are the ins and outs of this massive acquisition? What implications will it bring to the future of Midea and KUKA? Is the multi-billion-dollar deal a bargain for Midea?

Innovation and Application of Science and Technology
Headline Today, “What catches your attention makes a Headline” ! (Completed)
Faculty Advisor: Prof. Zhang Weining  Case Researcher: Li Mengjun
When portals of traditional media were pushing “all-the-same” news and information to users through manual editing, Headline Today already explored deeply into user’s demands through machine learning and big data technology. By pushing personalized information to each user, it has formed an information sharing model of “thousand news for thousand individuals”. Drawing upon its highly efficient distribution channels, Headline Today swiftly occupied the portals of news and information. This case themed by “application of AI in the field of information apps” will take an in-depth study on its business model and reveal some in-depth thoughts and insights of its founder on the company’s strategic positioning and development.

The Strategic Transformation of IBM, the advent of “Cognition Commerce” (Completed)
Faculty Advisor: Prof. Zhu Rui  Case Researcher: Deng Di
In cognition commerce, companies commercialize the application of cognition system composed by 3 major parts including big data, data analysis technology (cognition computing) and operating & delivery
platform. In cognition computing, data is processed by simulating human mind -- a combination of 3 capabilities, i.e. understanding, reasoning and learning. Besides the rapid development of cognition computing in medical field, IBM has also conducted numerous trials and applications in banking, insurance, retail, legal and energy industry. This case study material is mainly focused on its application in medical field, a priority of IBM's strategic transformation.

Shining 3D: Pioneer of 3D Printing in China (Updated case) (Completed)

Faculty Advisor: Prof. Li Lede  Case Researcher: Mei Xinlei

3D printing technology is known as the "most iconic production tool of the third industrial revolution". Shining 3D is the first company who put forward the idea of running the whole industry chain of three-dimensional printing. As an update to the case study material in 2015, it incorporates information of the performances of Shining 3D in the past two years and reveals how Shining 3D built the whole industry chain of 3D printing through own research and acquisitions. How it develops online and offline ecosystem through integration with the Internet is also discussed in the update.

Intelligent investment adviser (Temporary title) (Draft version completed)

Faculty Advisor: Prof. Ouyang Hui  Case Researcher: Zha Yihui

On 27 May, 2017, AlphaGo beat Ke Jie, the World Go Champion, in a man-machine battle at 3: 0. The impact of artificial intelligence (AI) has rapidly spread across all walks of life and has been constantly refreshing its revolution and rectifications. Internet financing firms were shut down for a whole year for uncovering and rectifications. Similarly, accounting for 43% of the total P2P network lending platforms. Similarly, Lending Club, the benchmark enterprise of global P2P industry, triggered huge volatility in capital market due to scandal of illegaly granting loans and suffered a plunge in its stock price. Amid all the negative news of the industry, Yirendai’s value was questioned by the capital market. However, Yirendai miraculously managed a performance turnaround. How could Yirendai outshine all the others? Underlying its steady growth are sound business model, professional risk control technology and constant technical innovation.

Yirendai –The Establishment of a Technical and Financial Service Platform (Draft version completed)

Faculty Advisor: Prof. Ouyang Hui  Case Researcher: Li Mengjun

In 2016, China Internet Finance has witnessed the most stringent new regulations on internet loans in the history and carried out special rectifications. Internet financing firms were shut down for a whole year for overhaul and 1841 problematic online financing platforms were caught, accounting for 43% of the total P2P network lending platforms. Similarly, Lending Club, the benchmark enterprise of global P2P industry, triggered huge volatility in capital market due to scandal of illegally granting loans and suffered a plunge in its stock price. Amid all the negative news of the industry, Yirendai’s value was questioned by the capital market. However, Yirendai miraculously managed a performance turnaround. How could Yirendai outshine all the others? Underlying its steady growth are sound business model, professional risk control technology and constant technical innovation.

Ali Cloud—Cloud Computing Empowers Enterprises (Work in Progress)

Faculty Advisor: Prof. Li Wei  Case Researcher: Gu Chongqing

Cloud computing is one of the hottest words in the current science and technology sector and economic sector. As the No.1 leading player of cloud computing in China, how did Ali Cloud make it to the leading position? What are its priorities of current focus? What views does it hold on the industry as a whole? We’ll explore the development road of Chinese tech companies through studying the Ali Cloud case.

Transformation and development of Traditional Firms

The Sustainable Development Road of Tencent (Completed)

Faculty Advisor: Prof. Zhu Rui  Case Researchers: Deng Di

As a matter of fact, this is only a reflection of Tencent’s ever-evolving understanding of the nature of businesses and enterprises on its way to growth. Coming all the way from isolation in its early days to its open approach today, the company has taken numerous initiatives and explorations in business and public welfare till achieved the present win-win and flourishing situation. In this case, we’ll review how Tencent made its way to what it is today and some relevant progresses and changes in its sustainable development.

Revolutionary Significance of Industry 4.0 to the Transformation and Upgrading of Chinese Manufacturing Industry (Article) (Completed)

Faculty Advisor: Prof. Du Jihong  Case Researcher: Deng Di

In recent years, redundant capacity and rising cost has been prevalent among Chinese manufacturing companies. In response to the dual pressure from new emerging market in Southeast Asia and the “re-industrialization” of European and American countries, it is an urgent need for Chinese manufacturing industry to transform and upgrade. In the process of exploring into the transformation, many companies have set their eyes on intellectual manufacturing, the new model represented by the Industry 4.0. However, there are still some unclear understandings about it. In this case, we will clarify its concept and definition, reveal its nature and shed some light on some of its applications suitable to Chinese manufacturing industry.

Baozun Inc., the “E-commerce Housekeeper” of Traditional Retail Brands (Completed)

Faculty Advisor: Prof. Zheng Yusheng  Case Researcher: Mei Xinlei

From suffering the impact of E-commerce to embracing the Internet, Chinese retail industry has experienced significant changes for more than one decade. China has already rapidly grown into one of the world’s most penetrated markets of online-retailing. However, how can the traditional brands transform their sales channels during this changing process? What type of role should the E-commerce provider play? How the trendy concept of “new retail” endorsed by Alibaba should be brought into reality? This case is mainly focused on the history of BaoZun E-commerce (NASDAQ:BZUN), analyzes how it adapts to the trend of retail industry and responds to the going-online demands of traditional brands and how it upgrades its business model in the new retail industry in terms of promoting digital marketing, practicing “Gig Group” strategy and positioning in whole-channel new retailing.

Hailan Home (HLA), Subvert the traditional industry (Completed)

Faculty Advisor: Prof. Li Lede  Case Researcher: Gu Chongqing

As the biggest men’s wear distributor in China, HLA has its unique
operation model - acquiring products from suppliers on credit and then selling them through franchised stores. Under this model, HLA has achieved quick expansion in short period of time. This business model will be depicted and discussed in this case.

**Huawei’s Cell Phone, the leader of the smart phone (Completed)**

*Faculty Advisor: Prof. Li Wei  Case Researcher: Li Mengjun*

When it comes to “Huawei”, people still consider it as a telecommunication equipment supplier. In traditional telecommunication market, Huawei usually comes across as “low key” and “reliable” which both are very good qualities for B2B market. Just because of these very qualities, Huawei has sold its telecommunication equipment to over 100 countries around the globe serving one third of the world population. But low profile can become an obstacle for a brand when it needs to directly deal with consumers. With Huawei’s launching of its cellphone business, how to turn a B2B brand into a popular B2C brand will be the biggest challenge for its end-market team.

**China Brands Group: IP commercialization Path (Draft version completed)**

*Faculty Advisor: Prof. Li Yang  Case Researcher: Zhu Yunhai*

Founded in 1999, China Brands Group (CBG) started from toll manufacturing of export-oriented garment. In traditional telecommunication market, CBG initially involved in intellectual property (IP) in 2005 and became the confidential producer of Olympic Mascots (Fuwa) in 2008. After years of exploration efforts made in the management and operation of IP project, CBG has successfully transformed into the biggest IP commercialization group in China today right at the forefront of IP industry. So, as an IP operating firm derived from a traditional manufacturer, what unique views does CBG hold on how to introduce IP? How does it carry out and run IP projects? What are its core competitive advantages?

**Strategic Transformation of Wanda Group (Temporary title) (Work in Progress)**

*Faculty Advisor: Prof. Teng Binsheng  Case Researcher: Zhu Yunhai*

As a traditional real estate developer, Wanda has become one of the biggest real estate enterprises in China even in the world by taking the competitive advantages? For inspection copies of these case studies, please contact the CKGSB Case Center at casecenter@ckgsb.edu.cn

**Corporate Governance**

*Faculty Advisor: Prof. Li Xuenan  Case Researcher: Mei Xinlei*

In the theory of corporate governance, agency problem exists in listed companies between the management and major shareholders due to the separation of ownership and operation. This has been fully demonstrated in Vanke’s equity fight which just came to an end in June this year. Two years ago, there was a crash in A-share market and insurance companies became capital predators among listed companies. Foresea Life Insurance of Baoneng Group together with its person acting in concert-Jushenghua attacked Vanke, the real estate giant, by a capital ambush. Thereafter, Vanke’s management and its major shareholders including China Resources, Baoneng, Evergrande and Shenzhen Metro started a war for equity control right. This case is focused on corporate governance issues arising from Vanke’s equity fight. The “Game of Thrones” will be analyzed from the following three aspects: 1. How did the capital “barbarian” come? From where did the disaster break out in Vanke’s management? What are the gains and losses? 2. How did Vanke break up with China Resources, its former biggest shareholder? 3. Where is it going after saved by its Chivalrous rescuer – Shenzhen Metro Group?

**New retailing**

Freshhema, new retailing business of Alibaba (Work in Progress)

*Faculty Advisor: Prof. Jing Bing  Case Researcher: Li Mengjun*

In recent years, on one hand, impact of E-commerce and increasing labor cost have caused revenue decline and lack of growth in traditional brick and mortar retailing businesses. On the other hand, the advantage of web traffic is diminishing and the growth of E-commerce is slowing down. Therefore seeking for innovation has become the common goal for both brick and mortar retailers and online retailers. Freshhema is Alibaba’s new attempt in new retailing sector. The business rationale and operation model of Freshhema will be studied in this case.

**Exploration into Charity and Social Innovation**

Adream Charitable Foundation – Running a charity like a business (Updated case) (Completed)

*Faculty Advisor: Prof. Zhu Rui  Case Researcher: Zhu Yunhai*

Adream Charitable Foundation is mainly committed to improving the quality of education in rural areas of China. It has transformed from a simple provider of education products to a platform of integrated resources, drawing government, schools, teachers and donators together as “dream partners”. The foundation drives co-development of quality education products through establishing chain knowledge stores.

**“China’s Business Conditions Index” Report**

*Monthly BCI Survey & Report (Work in Progress)*

*Faculty Advisor: Prof. Li Wei  Case Researcher: Gu Chongqing*

Although the private sector is the most dynamic force in the Chinese economy, an index to assess private enterprises operating conditions was lacking. To fill in the gap, we have compiled related indexes using data obtained from monthly questionnaire surveys among entrepreneurs in the growing CK alumni network. Each year 12 editions of the index will be released.
